PL 80

LEAF TURNSTILE WITHOUT LOCK

PL 80 leaf turnstile provides one-way control for a simple and basic solution. With its simple solution, it is generally used in markets and in any indoor entrance and exit.

Application	PL 80 leaf turnstile can be installed in various interior locations, that do not need any controlled entrance and exit like markets, warehouses.
Basic Materials	PL 80 is produced chrome-nickel plating on the body. Thank's to it's spring system inside it, provides simple one-way control. It provides passage to right side or left side. Side rights can be changed easily from top of the T80 Leaf turnstile. Disabled, enter and stop signs can be applicated on the plexywing.
General Usage	PL 80 works as one-way controlling. Any Access control reader can not connected to it as it has no mechanism inside it. It opens as pushing by hand in 90° width. After passage it closes itself as springs pushing wing.
